

SUBSTANCE ABUSE POLICY

It is the policy of The Rockefeller University to make every effort to ensure a drug-free workplace in order to protect the health, safety, and welfare of its employees, its students, and the public. The following guidelines have been established in order to maintain such an environment. **A student or employee who violates this Policy will be subject to University sanctions and criminal sanctions provided by federal, state, and local law.**

- (1) University policy prohibits the unlawful manufacture, possession, use, distribution, dispensation, sale, or purchase of non-prescribed controlled substances (drugs) and intoxicants (alcohol) on University premises or at off campus University-sponsored events.

The only exceptions are for consumption and/or possession of alcohol by those over the age of 21 at University-sponsored events (on or off campus) or in the Abby Aldrich Dining Room, the Faculty and Students Club, or University Housing.

- (2) All employees are required to report to their jobs in a good mental and physical condition. Any individual whose work performance is impaired by the use of drugs and/or alcohol will be considered a threat to the safety of his/her work environment, and subject to immediate discipline.
- (3) As required by the Drug-Free Workplace Act of 1988, an employee working on projects funded through federal contracts or grants must notify Human Resources or the Deans Office of a conviction of a criminal drug violation that occurred on University property within five (5) days of such conviction. The University is required to notify the relevant federal contracting or granting agency within ten (10) days and to take the appropriate personnel action within thirty (30) days of receipt of the notice.

A conviction includes: a plea or finding of guilty, any plea of “nolo contendere”, or an imposition of a fine or penalty.

- (4) Members of the University community who need drug and/or alcohol counseling, rehabilitation, or support services are urged to use the Employee Assistance Program (EAP). The EAP can provide both free, short-term counseling and referrals for long-term treatment, the cost of which is partially covered by health insurance. For more information regarding the EAP, contact Human Resources at (212) 327-8300, or contact the EAP at (212) 746-5890.

The Drug-Free Schools and Communities Act of 1990 requires that this Policy include descriptions of the health risks associated with drug and alcohol abuse and the legal sanctions under local, state, or federal law for illicit use, possession, or distribution of alcohol and controlled substances.

THE HEALTH RISKS OF ALCOHOL USE AND ABUSE

Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident. Low to moderate doses of alcohol also increase the incidence of a variety of aggressive acts, including spouse and child abuse. Moderate to high doses of alcohol cause marked impairments in higher mental functions, severely altering a person's ability to learn and remember information. Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce these effects.

Repeated use of alcohol can lead to dependence. Alcoholism is defined as a complex, chronic psychological and nutritional disorder associated with compulsive and/or excessive drinking. Alcohol is addictive in nature; it poisons the body, destroys the brain, heart, liver, and pancreas; it damages the digestive tract and immune system. Alcoholics are more vulnerable to heart disease, cancer, organ failure, and mental illnesses. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life-threatening.

Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than others of becoming alcoholics.

THE HEALTH RISKS OF DRUG ABUSE

Drugs are chemicals which cause physical and psychological dependence. Please review Chart A below, which describes the uses and effects of controlled substances.

FEDERAL TRAFFICKING PENALTIES

Please review Charts B and C below for a description of federal penalties for the trafficking of controlled substances.

FEDERAL PENALTIES AND SANCTIONS FOR THE ILLEGAL POSSESSION OF CONTROLLED SUBSTANCES

First Conviction - Up to one year imprisonment and fine of at least \$1,000, or both.

After one prior drug conviction - At least 15 days in prison, not to exceed two years and fine of at least \$2,500, or both.

After two or more prior drug convictions – At least 90 days in prison, not to exceed three years and a fine of at least \$5,000, or both.

In addition, the offender may be forced to relinquish personal and real property used to possess or facilitate possession of a controlled substance if the violation is punishable by more than one year in prison. Any vehicle used to transport or conceal a controlled substance must be forfeited and a civil fine may be imposed. For first-time offenders, federal benefits, such as student loans,

grants, contracts, and professional and commercial licenses, can be denied for up to one year. For the second and subsequent offenses, federal benefits can be denied for up to five years.

NEW YORK STATE AND CITY PENALTIES FOR DRUG POSSESSION

New York State law also forbids the possession, use, or distribution of illicit drugs and imposes criminal penalties, which may include imprisonment. The penalty imposed for a conviction will generally depend upon the specific drug and the amount of the drug held or sold, as well as the individual's history of prior convictions. Judges have some discretion to consider the circumstances in sentencing. The following are a few examples of potential criminal penalties for drug infractions under New York law.

- The criminal possession of 500 milligrams or more of cocaine is a class D felony, punishable by up to 2 ½ years in prison.
- The possession of one-half an ounce of cocaine or more is a Class C felony punishable by 1 - 9 years in prison.
- The criminal possession of eight to sixteen ounces of marijuana is a class E felony, punishable by up to 1 ½ years in prison for a first offense.

This list is not intended to be exhaustive and is subject to change. The full list of NY drug crimes and their penalties can be found in the New York Penal Code.

Under New York City law, a person who has been convicted of felony possession or sale of a controlled substance may be subject to a civil penalty between \$10,000 and \$100,000 for each count that resulted in a conviction and for the costs of the investigation and prosecution of the individual.

PENALTIES FOR UNLAWFUL DISTRIBUTION OF ALCOHOL

Under both federal and New York State laws, selling or otherwise furnishing alcohol to an individual under the age of 21 is a misdemeanor punishable by fine and/or imprisonment. Selling alcohol without a license or permit is unlawful and punishable by a fine and/or imprisonment.

VIOLATIONS OF THE SUBSTANCE ABUSE POLICY

The Rockefeller University will impose disciplinary sanctions on students and employees (consistent with local, state, and federal law), up to and including expulsion or termination of employment and referral for prosecution, for violations of this Policy.
